

CHEMICAL SPECIFICATIONS	
Oil Base	Mineral
Reccomended additives	Antifoan Antirust Antiwear Antioxidant Hydrorepellente

PHISICAL SPECIFICATIONS		
Absolute gravity (indicative)	kg/dm ³	0,85 ÷ 0,925
Kinematic viscosity at + 40°C working temperature ≤ 50°C	cSt	41,4 ÷ 50,6 (ISO VG 46)
Kinematic viscosity at +40°C working temperature 50 , 70 °C	cSt	61,2 ÷ 74,8 (ISO VG 68)
Viscosity index		> 130
Pour point (indicative)	°C	- 35
Flash point (V.A. - V.C.)	°C	> 190
Air release at 50°C (DIN 51.381)	minutes	< 6
Maximumworking temperature	°C	+ 70

Data reported in the above table cover most of the standard applications.

The maximum acceptable kinematic viscosity is 300 cSt. If the viscosity exceeds this value in cold ambient conditions, the oil must be electrically heated.
